Over the last 6 years, we've completed more than 12 projects in cooperation with one of the most important Czech development companies – P3 Parks. We crossed a milestone of 65 000 m² illuminated by our LED products last month and we're still counting. This area includes both the new construction projects and the spaces after renovation. Even though it is a drop in the ocean, the numbers above show what a significant change we have made to the environment.
